# ODP Leg 130 - Hole 807C

The following figure shows the main logs recorded in Hole 807C during ODP Leg 130.
All the data displayed can be downloaded from the ODP logging database:

**http://brg.ldeo.columbia.edu/data/odp/leg130/807C**

The figure was generated automatically, including the the estimation of ranges used for the data, and regardless of their quality. To get a more complete assessment of the quality of the data and a description of the processing, check the processing documentation:

**http://brg.ldeo.columbia.edu/data/odp/leg130/807C/documents/130-807C_info-std.html**

The logs displayed are the main data recorded by each of the tools deployed.
The gamma ray curves were aquired with each tool deployment and were used to match depth across all tools and passes.

The resistivity curves show the measurements made by the DIT at several depths of investigation (shallow, deep,...) during the longest pass.

The labels for each curve are derived from the name of the file in the database used for the figure.

Well-Log-Ch-Rel-WCT - CDP Log 1/60
