ODP Leg 178 - Hole 1103A

The following figure shows the main logs recorded in Hole 1103A during ODP Leg 178. All the data displayed can be downloaded from the ODP logging database: http://brg.ldeo.columbia.edu/data/odp/leg178/1103A

The figure was generated automatically, including the the estimation of ranges used for the data, and regardless of their quality. To get a more complete assessment of the quality of the data and a description of the processing, check the processing documentation: http://brg.ldeo.columbia.edu/data/odp/leg178/1103A/documents/178-1103A info-std.html

The logs displayed are the main data recorded by each of the tools deployed. The gamma ray curves were aquired with each tool deployment and were used to match depth across all tools and passes.

The resistivity curves show the measurements made by the DIT at several depths of investigation (shallow, deep,...) during the longest pass.

The labels for each curve are derived from the name of the file in the database used for the figure.

Main logs in Hole 1103A - ODP Leg 178

1103A cores Recovery	Depth (mbsf)	Hole Size	Hole Size	Gamma Ray	Density	Porosity	Resistivity	Static FMS conductive resistive	Dynamic FMS conductive resistive	Depth (mbsf)
